Centrifugal Force Test for Clutch Parts: Order / Offer

Data of test specimen

Type: Dual mass flywheel / Secondary mass / Clutch / SAC-Clutch / Dual clutch / Clutch disc / Pressing plate

Drawing No.:  

Dimensions: x mm
Bore diameter: ø mm (Centre hole)
Operational speed (n-max): rpm
Mass: kg
Unbalance: gmm
Bearing: one sided / double sided

Test data

O Test with stepwise speed increase up to a test speed of rpm
   (Start speed rpm, speed step rpm, speed period sec / min)
O Test with stepwise speed increase up to bursting rpm
   (Start speed rpm, speed step rpm, speed period sec / min)
O Test with continuous speed increase up to a test speed of rpm
O Test with continuous speed increase up to bursting
O Deformation measurement with Laser Light Barrier (Dynamic, resolution 0.01 mm)
O Test temperature: ° C

Further test data:

Report to: Bill to: Test specimen: Return / scrapping

Place, Date Stamp / Signature
